is to give joy, and of course this prim-ary aim should always be uppermost in

The simplest way to classify stories is

according to the age of the hearers.

Nursery rhymes are used universally as the very first stories, for they delight children who are still mere babies. The

jingling rhythm first attracts the at-

given in story-books. We have found that two-year old children greatly en-

joy simple tales relating their own per-sonal experiences, when told in a clear, direct manner. For instance—'Once a little boy named Preston went out for

a walk, and he fell down and began to cry. His friend, the squirrel, ran down from a tree, and looked at him. Then

Those who have received the seeds are felly aware that it would be far better for the government to keep the money that is involved in the plan in the treasury, or make use of it for perter purposes. It is one of the ways in which government expenditures can be curtailed without causing any foca or handlesp to those in whose interests the free seed distribution is advocated. The fact that the regular appropriation has not been included in the bill cannot however, be regarded as reflecting the
